

Dear Powerflex Partner

New Product Release

Porsche 964 Carrera 2/4, Turbo & RS 1989-1994

Powerflex is proud to announce an addition to the existing range of low compliance Polyurethane bushes for the Porsche 964.

Part Number **PFR57-106** Rear Trailing Arm Front Bush.

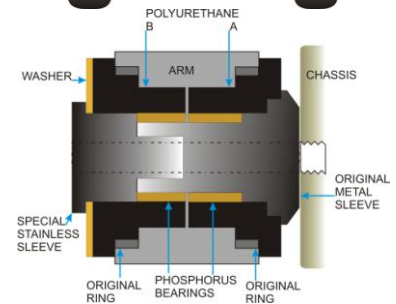

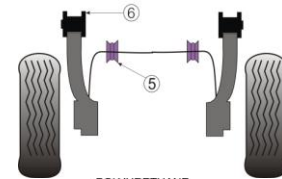

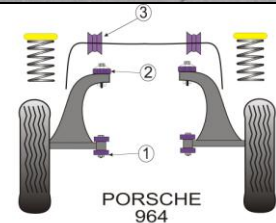

The original bush is no longer available from Porsche except if brought with the rear arm which costs in excess of £1000.00. With the cars been over 15 years old if these bushes have not been replaced they could be causing all sorts of geometry problems, leading to excessive tyre wear, handling problems, knocking etc.

Powerflex developed the replacement bush with similar torsional characteristics to the RS version, which is up-rated over the rest of the models in the range. Included in the low compliance design are 2 OilLite bearings allowing the arm to pivot around the central sleeve with minimal drag.

The **fitting instructions** are available to view and download on the Powerflex website.

Until next time, the Powerflex Team.
