progression in suspension

Dear Powerflex Partner

Powerflex has introduced a set of bushes which will cover the VAG Group of cars using the A5 PQ35 Platform.

This platform updated the rear suspension from the rear beam, as used on earlier models, to independent rear suspension. Independent rear suspension offers better ride quality and handling characteristics, due to lower unsprung weight and the ability of each wheel to address the road undisturbed by activities of the opposite wheel.

The models now available from the PQ35 platform are as follows

Audi

- [A3 Mk2 Type 8P 2003-](#)
- [S3 Mk 2 Type 8P 2006-](#)
- [TT Mk2 Type 8J 2007-](#)

Seat

- [Altea Type 5P 2004-](#)
- [Leon Mk2 Type 1P 2005-](#)
- [Toledo Mk3 Type 5P 2004-](#)
