Dear Powerflex Partner

Powerflex has introduced two replacement bushes for the lower engine mounting on the Ford Fiesta Mk6 including the ST. These compliment the range of suspension bushes already produced.

[PFF19-2001 Lower Engine Mount Large Bush](#)

[PFF19-2002 Lower Engine Mount Small Bush](#)

[Fiesta Mk6 Catalogue page link](#)

The original bushes can allow excessive engine movement which can cause exhaust failures. The Powerflex mounts have been developed to limit the engine deflection. Both of the mounts are manufactured in our 70 shore material which allows more control and less engine movement over the original mounts. Another gain is the drive is more direct to the wheels thus not losing power under acceleration.

Until next time, the Powerflex team
