progression in suspension

Dear Powerflex Partner,

NEW PRODUCT RELEASE

PFF69-102G FRONT ARM, REAR BUSH - CASTER ADJUST

Vehicle applications,
(always refer to catalogue for current listings)

Subaru Impreza GC,GF 1994-2000

Subaru Impreza GD,GG 2000-2007

Subaru Legacy BC,BF,BD,BG,BE,BH 1989-2002

PFF69-102G bush comes from the range of **Geometry Adjustment Components (GAC)** available from Powerflex

PFF69-102G has been designed to complement the existing range of bushes, now giving two options;

PFF69-102 - standard replacement bush

PFF69-102G - CASTER adjustable replacement bush

Advantages of increased positive CASTER;

Improved high speed stability

Increased dynamic negative camber

Improved road feel, steering feedback and sensitivity

Improved turn-in response during corner entry

PFF69-102G has been engineered to allow caster adjustment, with a designed static adjustment range of +/- 0.33 deg. or equivalent of +/-0.5 deg dynamic adjustment due to the low compliance bush.

The full contact face design of the Powerflex bush increases thrust load capacity, further maintaining correct dynamic suspension geometry.

Until next time, the Powerflex Team.
