WHY

POWERFLEX

POLYURETHANE

SUSPENSION BUSHES?

Polyurethane has been with us as a specialist plastic for some thirty years and recent advances have now made it possible to engineer very special properties into this exciting material.

Suspension bushes are some of the most highly stressed components fitted to vehicles. They undergo enormous strains and in the most arduous of conditions with no maintenance or lubrication

Standard bushes are manufactured from a rubber compound containing natural products. This material deteriorates with age becoming softer and more pliable. It starts to resist the forces placed on it less and less, allowing greater movement of suspension components.

The result - less control over suspension geometry, accelerated tyre wear, braking instability and poor handling.

This is the single biggest reason you can instantly tell the difference driving a three year old car compared to a showroom new one. However, even new cars will benefit from POWERFLEX bushes. Because of their superior design they offer much more effective control of the suspension components than standard rubber items.

With the technological advances in this material it has been possible to overcome the common problem associated with harder bushes which is increased noise. By correctly engineering the polyurethane compound, bushes can be made 25-30% stiffer than new rubber ones but with exactly the same noise absorbing properties

POWERFLEX FOR PROLONGED TYRE LIFE

POWERFLEX FOR IMPROVED PERFORMANCE

POWERFLEX FOR INCREASED SAFETY

PRODUCT INFORMATION FOR POWERFLEX MOTORSPORT UNIVERSAL RANGE OF BUSHES

POWERFLEX Motorsport bushes have been developed to fulfil the demands of motorsport engineers and specialist car builders, both amateur and professional.

These bushes are manufactured solely with performance in mind for those who demand the very best.

They are available in a range of universal sizes enabling the engineer to design and manufacture the component to the bush or modify the bush to the component.

They are supplied in a black Shore A, 80 material, which is durable enough for high stresses but does allow the slight deflections and misalignments, which occur during suspension movement. There are three types of kit available. The 100 Series kits consist of three components, the 200 Series, two components and the 300 Series, two also.

100 Series: Two “top-hat” polyurethane components and one stainless steel sleeve. The sleeve is supplied over-length and with a pilot bore only. The sleeve can then be machined to length and drilled to the correct bolt size for fitment. The 200 Series kits are two POWERFLEX “washers”. The 300 Series consists of two universal anti roll bar mounts.

Typical applications for the 100 Series range are:

- Swinging arm location.
- Wishbone ends.
- Shock absorber “eye” mounts.
- Engine steady bars
- Axle location

Typical applications for the 200 Series range are:

- Body panel spacers
- Shock absorber top mounts
- Vibration absorbing washers
- Shock absorber travel limiters

Typical applications for the 300 Series range are:

- Anti-roll bar mount

This range of bushes has been developed so that additional machining to size can be carried if required.

HOW TO USE THE CATALOGUE

6 easy steps to find the correct Powerflex bush for your vehicle;

1. Find the correct vehicle listing starting with Make, Model and series.
2. Determine the front or rear bush location on the car.
3. Find the correct part description, paying attention to any notes such as sizes.
4. Look up the Part Reference Diagram to confirm the correct bush location.
5. Read the part number in the Part Number column.
6. Check any footnotes for important information.

Ordering:

Powerflex bushes contain 1 bush per part number (or 1 bush assembly for example 2 "top-hat" bushes and 1 inner sleeve) unless otherwise stated. Each bush is priced and invoiced individually, but are boxed and must be ordered per car quantity.

Powerflex Product Application Catalogue

Edition 1.24 10/08/2009 15 53

Loc		Description - Part Note	Part Reference Diag.	Loc.	Part number	Footnote	Qty/car	Price (ex VAT)

Rear	Subframe to chassis bush		20012	11	PFR5-305		2	£29.65

Footnote Register

6 PFF3-510 suits later model vehicles with the larger front bush - the OE arm is marked 8N0 407 165/166. For early model cars use PFF85-201, with OE arms marked 8N0 407 151/152.

7 PFF5-303 is an eccentric bush to suit M3 or where increased caster is required.

8 PFF5-602 suits 520 to 530 models with steel arms. PFF5-620 suits 535, 540 & M5 with alloy arms.

Footnote Register

- 1 Powerflex bushes are designed to fit genuine OEM control arms only. Bush kits supplied with a choice of various bush sizes; 35.0mm, 47.5mm & 48.75mm OD. Measure OE bracket inside diameter before ordering.
- 2 Up to 1994 chassis # 8B-L-003791. Check front shock absorber after 1991 the anti-rol-bar may be linked to the wishbone with a metal joint so there is no outer anti-roll-bar mount.
- 3 Up to 1992 chasis # 8A-N-200-000 use PFR3-110, 1992-on use PFR3-111.
- 4 There is a possibility that on late cars PFF85-201 is replaced with PFF3-501. This is the larger 45mm diameter front bush. Please check on late cars.
- 5 PFF3-610 fit cast arms. PFF85-410 fits pressed steel arms.
- 6 PFF3-510 suits later model vehicles with the larger front bush - the OE arm is marked 8N0 407 165/166. For early model cars use PFF85-201, with OE arms marked 8N0 407 151/152.
- 7 PFF5-303 is an eccentric bush to suit M3 or where increased caster is required.
- 8 PFF5-602 suits 520 to 530 models with steel arms. PFF5-620 suits 535, 540 & M5 with alloy arms.
- 9 PFF5-501 suits 535, 540 & M5 models. PFF5-510 suits 520-530 models & Z8.
- 10 PFF5-4602-size suits models with M Sport II suspension.
- 11 PFF5-4601 is designed to fit front wishbone rear bush mount with 66mm bore (BMW OE part# 31 12 6 757 623). PFF5-4601-60 is designed to suit earlier models with 60mm bore mounting. PFF5-4601Xi suits Xi models and are all 66mm. PFF5-4601M3 suits M5 models only - these normally use 60mm bracket. Please check OE bush and mount prior to
- 12 PFF5-101MS is an optional support if using PFF5-101 for motorsport.
- 13 PFR5-1102 suits 2003-2004 models with smaller trailing arm bush.
- 14 PFF5-104 & PFF5-105 will not fit some cars from 2004-on which use oil filled OE engine mounts.
- 15 Check rear suspension layout. Vehicles up to 1996 use PF8-903. Vehicles after 1996 use PF9-901.
- 16 PFF12-102 suits Mk1 only, plate number uo to 5277.
- 17 PFR12-108 suits early models with smaller M10 bolt. PFR12-109 suits late models with larger M12 bolt. Check bolt size before ordering.
- 18 Fitment of PFR19-207 means there is no need to replace the whole control arm. There is no standard replacement bush available from Ford, and complete arm costs £145.
- 19 Ford has changed the diameter of the wishbone bushes several times. PFF19-601 is 46mm, PFF19-602 is 54mm, PFF19-901 is 47mm, PFF19-902 is 60mm. Check outer diameter of original bushes prior to ordering.
- 20 PFR19-607 suits Mk7 rear beam axle with larger bush.
- 21 Front wishbone bushes will not fit ST24 & ST200 models.
- 22 PFR19-111 kit is supplied with new mounting bolt. For ease of removal, original Ford bolt needs to be cut off. Full details enclosed in the fitting instructions.
- 23 Check model year. Pre '95 models have a narrower bush. Please state when ordering.
- 24 PFR69-200 are replacement forged aluminium endlinks including Powerflex bushes.
- 25 PFR69-510G & PFR69-511G must be ordered and fitted together as a complete matching set.
- 26 There are 2 types of radius rods fitted to this vehicle; threaded pin with nuts radius rod type OR eyelet with pressed in through bush type. PFF76-301 is designed to suit the threaded pin type radius rod, and is not suitable for any other type.
- 27 PF79-102S includes special stainless steel sleeve for spot weld on wishbones.
- 28 PF79-101W includes a single stainless steel washer for additional support.
- 29 G40 Polo may be fitted with metal inner control arm bush. If this is the case, then PFF85-103 will not fit.
- 30 PFF1-811 - Alfa Romeo use different size pins on the OE arms, 19mm or 20mm. Please measure and advise of time of ordering.
- 31 PFF1-812 - Pin diameters may vary on the arms; 20mm standard or 21.3mm. Please measure and advise at time of ordering.
- 32 Tear drop shape, width between end plates 21mm. Check original shape, 2 variations available.
- 33 For models without link rod between ARB and arm.
